PROFESSIONAL SUMMARY

Aspiring Software Developer currently studying at IT Varsity with practical experience in building web applications, backend systems, AI integrations, and IoT projects using ESP32 microcontrollers. Passionate about solving real-world problems through software and hardware integration. Strong focus on backend development, APIs, and embedded systems.

EDUCATION

IT Varsity – Software Development Programme 2025 – Present

Software development training (Python, JavaScript, HTML, CSS)

Backend development using Flask and APIs

Real-world project building and Git/GitHub version control

Mzinoni High School Matric – 2022 Subjects:

English, IsiZulu,

Mathematics, Physical Sciences,

Geography, Life Sciences, Life Orientation

TECHNICAL SKILLS

Python (Flask, APIs)

JavaScript, HTML5, CSS3

ESP32 IoT Development

Sensor & Hardware Integration

REST API Development

Git & GitHub

OpenAI API Integration

Responsive Web Design (Flexbox, Grid)

WORK EXPERIENCE

Moyela Carpentry – Technical & Administrative Support Oct 2025 – Present

Support business operations and digital systems

Assist with client communication and workflow management

Work with structured real-world processes

Gain professional workplace experience

PROJECTS

AZI Security System (AI + IoT)

AI-powered surveillance system with ESP32 integration

Real-time radar dashboard and sensor monitoring

Threat detection system with alerts

Tech: Python, Flask, ESP32, OpenAI API

Flask CRUD Task Tracker

Task management system with full CRUD functionality

SQLite database integration

Tech: Flask, Python, SQLAlchemy

E-Commerce Website (IT Varsity Project)

Multi-page product catalogue system

Responsive UI design

Tech: HTML, CSS

Gage Code Academy Website

Landing page with authentication UI

Video background and responsive design

Tech: HTML, CSS, JavaScript

CAREER OBJECTIVE

To grow as a Software Developer specializing in backend systems, AI applications, and IoT integration while contributing to innovative technology solutions.
